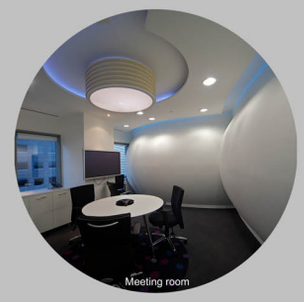
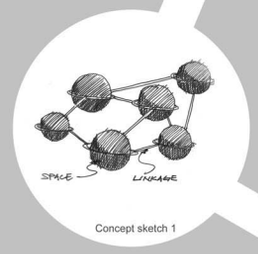
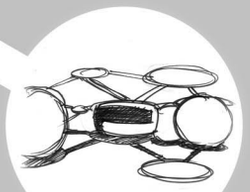
“The Link to the Future”



Meeting room



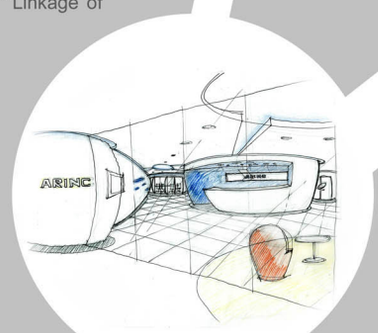
Concept sketch 1



Concept sketch 2

Inspired by the business nature of “Aeromobile” which connect people from one place to another, we have adopted the idea of Network and Linkage as our design concept.

We have developed fr om 2D image to 3D space with the idea of “Linkage of space” in mind.

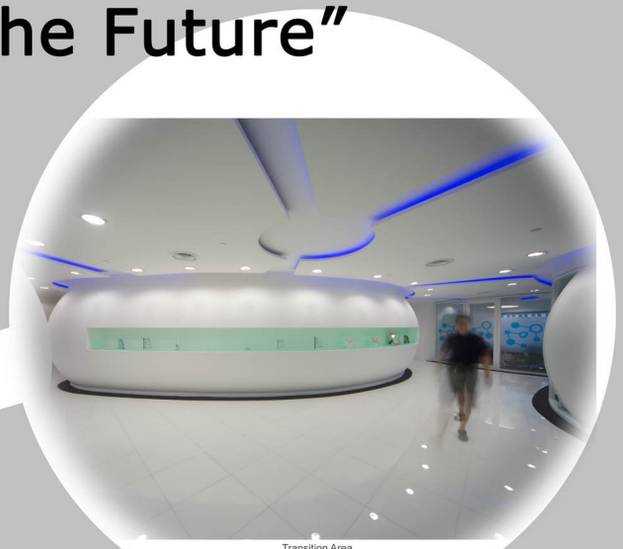


Design sketch

Reception

Spherical form meeting rooms are carefully planned, to interact and interlock with each other, suggestion the idea of Networking and Linkages. Ceiling feature that circulate around the meeting rooms are connected with recess cove light representing the linkage of different space. LED cove light is programmed for colour changing, to simulate and enhance the effect of connectivity and data exchanges. The LED technologies further enhances the modern, futuristic look to the Arinc’s new Asia Pacific headquarter in Singapore.

Entrance



Transition Area

Meeting room

General office

A large amount of ambiance lighting is used through the meeting rooms to general office area to replace the traditional fluorescent light, creating a warm and cozy atmosphere for the working environment. The open ceiling feature with round pendant lights is inline with our spherical design concept.
